

AZURE Aero's prime objectives and work ethic revolves around customer satisfaction, world-class service delivery, honesty, reliability, quality, conformance and aviation safety.

The company strives to constantly monitor, improve and build on its reputation, policies and procedures as a leading support, supply, consultation and aviation parts, services, aircraft sales & leasing support partner. To always maintain and ensure that international regulations, certifications, ITAR and export regulations are conformed and adhered to at all times.

AZURE Aero will always ensure that any and all products supplied to a customer (Aviation and Non-Aviation), conform to the defined OEM standards, specifications, certification, conformance and traceability, (Aviation - as stipulated by FAA AC-056B, EASA and SCAA (FATA) Regulations, as well as MIL-Spec, where applicable).

To this end the company has developed, implemented and maintains systems for:

Quality assurance & inspection

Training

The use of a controlled document of written policies and procedures

Regulatory documents, record storage and parts traceability

Obsolescence management

Health and safety

Regulatory circulars and directives updated and implemented

Conformance with export control regulations

Conformance with TRACE - Anti-bribery and corruption policies

Supply chain activities to manage a list of approved, accredited, certified and reputable OEM's, MRO's, vendors & suppliers

Maintaining of certifications, professional institution memberships and active involvement in the Aviation Industry.

AZURE Aero, its management and staff's promise is to keep open, honest and verified communication internally & externally with suppliers, customers and regulatory institutions to maintain a working environment which conducts business with integrity, ethic and constant improvement, in terms of its operations, policies and procedures.
